

PRECISION CONSULTING

QUANTITATIVE, QUALITATIVE, AND STRATEGIC CONSULTING

ACADEMIC INTEGRITY POLICY

The Management and Staff of Precision Consulting view our positions as that of educators and tutors who assist our clients in the educational process. We view the integrity of the academic process as a cornerstone of the advancement of knowledge and as such wish to re-assert the following:

Data Integrity: All data received by Precision Consulting for the purposes of analysis is to be an honest and true record. "Invented" data may not be used in academic work without prior authorization from the instructor and acknowledgement. All data sources must be thoroughly documented and accompany the work.

Citations: When referencing information from an outside source, the client must acknowledge the actual source from which the information was obtained. All references must be cited appropriately and according to the style guides applicable to the work in question. Original quotes must be denoted as such.

Plagiarism: Plagiarism, commonly understood as passing off another's ideas as one's own, is unacceptable in any proper academic work. Original research is the heart of academic exploration and accordingly Precision Consulting does not endorse the usurpation of another's effort. All documents submitted by the staff at Precision Consulting are intended as educational tools to enlighten and edify our clients' studies. These documents are not intended for submission by our clients, but instead are to serve as tools for the client to complete their research.

The obvious and sole exception to the submission policy would be for clients of Precision Consulting Editing Services. In such cases, Precision Consulting is explicitly assisting the client with preparation of the work for submission as per the standard set forth by the client.
